To whom it may concern:

I am a chiropractor practicing in Fayetteville, Arkansas. My passion in life is to help those with hopeless conditions, and those people in chronic, severe pain. No one fits this description better than the RSD/CRPS patient.

Due to the fantastic results that I have obtained using the Neurologic Relief Center Technique, I have gained an excellent reputation in the RSD/CRPS community as a doctor who not only understands this condition, but gets groundbreaking and astounding results, using a completely non- invasive treatment approach. In the summer of 2009, I was invited (together with another NRCT practitioner) to speak at the RSD/CRPS dream of a cure event in Denver, CO. My clinic is also listed under "treatment options" on the www.crpsworldwide.org website.

If anyone with RSD/CRPS has an opportunity to be informed about this groundbreaking work, or tested, to see if they would be a good candidate for treatment, I highly recommend that they seize the opportunity.

Please contact me, should you have any other questions regarding this matter.

Yours sincerely,

Dr. Katinka van der Merwe D.C. Q.N
